

Universal Display - Software Release Version 2.1.6

Details

Date of Release	15th March 2018
Exact Version	2.1.6+rev.ce89b8e

New in this release

NAA-270 & NAA275	<p>A user will be able to apply future updates to a display providing it has been programmed with this release of v2.1.6 or greater.</p> <p>It can be achieved by one of two methods:</p> <ul style="list-style-type: none">- Using a computer on the same network as the display to transfer an update package file via a web browser or command line.- Using a USB flash device (or SD card) directly connected to the Display to automatically copy over the update. <p>Full instructions for this can be found at: www.netthings.co.uk/softwareupdates</p>
------------------	--

Defects Fixed

NAA-286	<p>On some networks with a network mask different from 255.255.255.0, the device discovery would return no result. This has been resolved and the device discovery will work independent of the mask.</p>
