

Compatible domestic gas meters

Here are the common domestic gas meters that can be used with Netthings energy monitor.

If your gas meter is not pulse enabled then it will need to be swapped out by your energy provider. Contact them and they will be able to assist you with changing it.

Should you need a pulse block for your meter we can supply these to you upon request.

METUR005
PULSE BLOCK FOR SENSUS U6

METUR006
PULSE BLOCK FOR ACTARIS SC6

METUR002
PULSE BLOCK FOR ELSTER / JEAUVONS U6 TO U160

METUR007
PULSE BLOCK FOR ACTARIIS / ITRON U6 TO U160

Elster Smart gas meter

We cannot connect to Smart meters as they use different technology designed to send your meter reading to the in home display and also to the utility company

Have you already got a pulse enabled gas meter?

The photo of the adjacent gas meter face shows that it has a value of

1 PULSE = 10dm³

This can be used as an indication that your meter is already pulse enabled.

Note – You will need to note this value for channel setup purposes during commissioning
